Eelco Hilgersom, 1979'da Amsterdam'da doğdu. Çocukluğundan itibaren, doğanın yarattığı mimariye duyduğu hayranlık, sanatçının doğal formlara ve organizmalara dayalı soyut eserler yaratmasında temel oluşturdu. Tüm çalışmalarında şekil, renk ve malzemede zıtlıklar arayan Hilgersom, amacını "Eserin zıtlıkları ve karmaşıklığı aracılığıyla izleyicilere dokunmak ve onları işin içine çekmek." olarak özetliyor.

Bu amaca ulaşmak için farklı teknikler ve malzemeler kullanan sanatçının en son serisi "Habitat" taki eserleri, doğanın yarattığı pek çok organizmadan ilham alıyor. Farklı yapıları ve renkleri karıştırılarak soyut bir şekilde tasvir edilen organizmalarda her şekil ve renk farklı bir duyguyu taşıyor. Bu sebeple "Habitat" ailesindeki her canlının, iletmek istediği bir duyguya karşılık gelen kendi adı bulunuyor.

Eelco Hilgersom, 2023 yılı başından itibaren Türkiye'de EArt Galeri tarafından temsil edilmektedir.

Eelco Hilgersom was born in 1979 in Amsterdam. And since childhood, he has been fascinated by the architecture and structures that nature creates. This fascination drives him to create abstract works based on these natural forms and organisms. In all of his work, Eelco is looking for contrasts in shapes, color or material. "My aim is to touch the observers and take them into the work through the contrasts and complexity of the piece." To achieve this goal he uses different techniques and materials.

His artworks from the Habitat family are inspired by the many wonderful organisms that nature creates. The color, structure and capabilities of the skins of these organisms give each being its own ability to convey a message. Colors are used to scare an enemy or to seduce a partner. The brighter the color, the better the message gets across. In the Habitat family, different structures and colors of the organisms are mixed and depicted in an abstract way. The organic shapes, colors and the reflective surface create a new kind of creature that wants to convey a message or an emotion. Every shape and color conveys a different emotion. And that is why each creature from the Habitat family has its own name, which equates to an emotion it wants to convey. Such as Brave, Juicy or Foxy. There are creatures that consist of a single shape and there are creatures that consist of multiple shapes.

Eelco Hilgersom has been represented by EArt Gallery in Türkiye since the beginning of 2023.
